Internship/Projects

Duration: -	August 2017- Ongoing
Project Title:	**C to C intelligent e-commerce portal**
Mentor:	**Dr. Kingshuk Srivastava (Assistant Professor)**
Description:	We'll be developing a generic customer to customer online renting and selling platform using **AngularJS** for front-end and **enterprise java** for backend. We'll be performing business analysis for the same using **python**.

Duration: -	January 2017- May 2017
Project Title:	**Noise cancellation for long distance transmission in voice communication**
Mentor:	**Mr. Pankaj Badoni (Assistant Professor)**
Description:	In this project we Used **OpenGL**, **Java and Audacity** to devise a noble approach for cancellation of noise (echo) from a voice signal. We created a noise filter which is capable of removing echo of a particular time delay from a voice signal. We'll be developing a method to remove the background noise and the noise introduced during the transmission of signal to transmit the desired signal with minimum noise.

Duration:	August 2016- December 2016 (5 months)
Project Title:	**Zooming and cropping of a BITMAP image using C**
Mentor:	**Dr. Ajay Prasad (Assistant Professor)**
Description:	It is a console application which reads a bitmap image and provides the functionality to zoom or crop the image and is **coded in C** language. This project is being implemented without any use of C library of image processing, in order to understand the very basics of **image processing** concepts.

Other Projects:

Institution:	**SFS by Sebiz InfoTech.**
Duration:	June 2016- July 2016 (2 months)
Project Title:	**Resume Automation**
Mentor:	**Mr. Gaurav Sharma**
Description:	It is an application which takes personal and academic details as input through forms and returns a resume in a PDF format with a proper template. This system allows user to create a decent resume and provides the facility to update his/her existing resume. It is coded in **JAVA**, and uses **MySQL** as DB. **iText library** is being used to create a PDF file.
